

IV Vitamin Infusions by Farsk

FÄRSK

Glut Glow

DETOX | REPAIR | STRENGTHEN

Assists in treatment of

- liver diseases
- Parkinson's disease
- Multiple sclerosis
- Insulin resistance

- Glutathione is a powerful antioxidant that helps fight free radicals in the body. Its levels can decline if the body isn't getting enough selenium and vitamin C, which are important building blocks for glutathione.
- This IV drip is a solution to help increase glutathione levels by injecting glutathione directly into the bloodstream.
- Benefits of this treatment include: restoring an over-stressed immune system, reducing inflammation in the body, boosting a sluggish metabolism, and enhancing mental clarity
- Has been found to decrease wrinkles and increase skin elasticity giving a youthful glow
- Can help detoxify drugs, pollutants, and naturally created chemicals in the body
