# FÄRSK

# Immune

## PROTECT | REPAIR | SUPERCHARGE

### Assists in treatment of

- Recovery after surgery
- Wound healing
- Compromised immune system
- Vitamin deficiencies
- Recovery after illness
- Strengthening of the immune system

- This IV drip was developed to supply the necessary vitamins, minerals and amino acids for improved immune function, which enhances the body's ability to protect itself -including fighting infections, healing efficiently, repairing cells, and recovering faster.
- IV Immune provides an effective electrolyte balance and it is isotonic to blood, giving the immune system a functioning boost.
- Promotes healthy aging
- Increases red blood cell production
- The key vitamins in this treatment are vitamins A and D along with high levels of vitamin B and C and zinc
